Dear Sir:

Enclosed two pages from T. H. Tetens book "Road to Treason". His allegations that the more than strange war of Yom Kippur and ensuing "oil crisis" were concocted by the President and Kissinger with full knowledge of the Moscow bolshewicks, arabs and oil concerns are sinister and unbelievable but fit the pattern. On page 45 Tetens calls the President political crook. Does the White House intend to clear itself of the above monstrous accusations and send Tetens to the Tortuga Island? There is always a limit to the "bourrage de crans", French equivalent to brain washing. I can only pity U. S. born nuts for their naivete.

Tour humble servant and taxpaying sucker,

N. Kotikov
